

# SH-BTHS1-OTHW

## RUGGED BLUETOOTH® MONO "OVER THE HEAD" HEADSET

( *Headsets - Bluetooth* )

Bluetooth®	V4.2 ( A2DP; HFP; HSP; EDR; Qualcomm® CVC )
Bluetooth® pairing	NFC (Tap-to-Pair)
Bluetooth® pairing	QR code (Scan-to-Pair)
Bluetooth® pairing	Manual
Bluetooth® range	10 m
Sound technology	Qualcomm® CVC ( 97.5% noise cancelling microphone )
Weight	93 g ( 85g without battery )
IP Index	IP67 ( also Mil-STD-810 rated )
Operating temperatures	- 30 to + 50 °C ( Waterproof, Freeze proof )
Material	Acrylonitrile Butadiène Styrène (ABS) ( outer shells )
Material	Metallic ( headband arc )
Main colour	Black
Size	Universal ( adjustable headband )
Battery type	Li-PO
Capacity battery	190 mAh
Rated voltage	3.7 V
Certifications	CE
Certifications	FCC
Certifications	IC
Certifications	WEEE

## A versatile wireless industrial headset to optimise your voice picking activities

Rugged, lightweight, modular and with excellent audio quality, this Bluetooth® SILVERBACK® **Mono** headset will provide your picking operators with full shift comfort and stability:

- Ruggedness at all times: withstands the most demanding environments and harsh operating conditions (IP67, Mil-STD-810, use from -30° to +50° C)
- A featherweight: 93 grams (OTH version)
- High quality sound: high-performance noise-cancelling microphone (97.5% active noise cancellation), enhanced speaker output 125 dB, to either right or left ear (swivel microphone boom)
- Versatile and ergonomic: 4 versions available (mono, stereo, behind the neck, for safety helmet)
- Modular: interchangeable parts easily and quickly (you can replace the micro and speaker foams for multi-user use, replace the headband yourself in case of breakage, or also change the headset model without having to buy a new one)
- Universal: works with any device with standard Bluetooth® (mobile terminals, PDAs, industrial tablets and smartphones, etc.)
- High autonomy: 16 Hour Talk time with a battery before swap out is needed
- Flexibility of use: hot swap removable battery (to allow you to continue working without losing the BT connection with the paired mobile device)
- Simple and fast Bluetooth® pairing: via barcode reading ("Scan-to-Pair" with devices supporting BT Mac Address Scanning), NFC ("Tap-to-Pair" with devices supporting an NFC Connection), or manually

Each headset is delivered with its rechargeable battery (SB-BTHS1), and already installed: 1 microphone foam (SK-BTHS1-MF) and 1 standard speaker foam (SK-BTHS1-SF).

The charger (2 or 10 slots) and the other available accessories are to be ordered separately.

15 months warranty

(incompatible with VOCOLLECT® talkmans due to the manufacturer's specific and closed BT protocol)

*Especially designed for voice picking operations, our headsets are tested and proven daily in the most demanding industrial and warehouse environments worldwide*
